

# Bolon Care+

## Facts and general advice

Only the authentic and original Bolon flooring will deliver these benefits.

### Easy to Clean

- With only a vacuum, brush, microfibre mop and water, Bolon is simple to clean.

### Durable

- Bolon boasts the highest possible textile wear rating.

### Sustainable

- Green Building Level A Accreditation.
- 0% waste in manufacturing.
- Up to 33% recycled content in the backing.
- Best practice independent accreditation

### Impervious

- Liquids and dirt will not penetrate the material.

### Local Support

- Over 15 years in the Australian market, The Andrews Group offers complete pre and post purchase support to Bolon clients.

### Quality

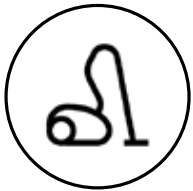

- 100% produced in our factory in Sweden.
- Bolon will not fray or unravel; seams will not split if installed correctly.
- Our product comes with 10 and 15 year commercial warranties.

### General Advice

- Design, colour, installation methods and environment all impact cleaning frequency and requirements.
- To maintain a clean floor, please follow our simple cleaning instructions.
- To prolong the life of your floor use an efficient entry system to avoid up to 85% of all incoming dirt, ensure regular maintenance and place furniture pads on chair legs.
- When using a machine to clean, always follow the instructions. Incorrect use of the machine can damage the floor.
- Do not use acetone or polish on Bolon products.
- For information on how Bolon addresses the Australian Wool Testing Authority (AWTA) health standards, refer to the [Bolon AWTA summary](#).

Daily / regular maintenance

To maintain a clean floor, follow our simple cleaning instructions. Bolon floor coverings are water resistant, can be scrubbed and cleaned using wet methods.

## **Vacuum**

- Vacuum area.

## **Spot Clean**

- Spot clean with a scrubbing brush (or Scrubber-Dryer machine with soft brush rollers) and warm water.

## **Dry**

- If required, wet areas can be dried with a soft or microfibre cloth.

99% of cleaning questions can be addressed by following our simple cleaning instructions.

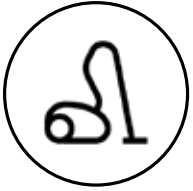

# Bolon Care+

## Spot cleaning and stain removal

### Spot Cleaning

- For dry spills, use a vacuum or brush and pan to clean the spill.
- For spot removal, use a scrubbing brush, warm water and a minimal dose of all-purpose cleaner with a PH of 7. Scrubber-Drying machines can also be used if preferred.
- Dry any wet areas with a soft or microfibre cloth.

### Stain Removal

- Treat the stain as soon as possible for best results. Most stains can be removed with a scrubbing brush and water.
- If using a stain remover, ensure it is safe to use on vinyl flooring.

### Removal of Challenging Stains

#### Stain

Chocolate, fat, juice, coffee, beer, wine  
 Asphalt, oil, shoe cream, chalk, ink  
 Blood  
 Rust  
 Water-based glue  
 Solvent-based glue  
 Marks from shoes  
 Chewing gum

#### Advice

Hot water with strong cleaner  
 Chemically pure petrol  
 Cold water and ammonia (if needed)  
 Light acidic (PH 3-4) cleaner  
 Hot water  
 Chemically pure petrol  
 Rub with dry cloth  
 Hot steam

## Machine or restoration cleaning

### **Machine - Wet Vac Scrubber-Dryer Method**

The use of the Wet Vac Scrubber-Dryer method will depend on the size of the project, level of traffic, likelihood of spills and colour choice.

- Vacuum relevant area.
- Use a Scrubber-Dryer machine with soft brush roller and warm water. If possible, clean the floor along the longitudinal weave direction.

### **Restoration Clean**

A poorly maintained or extremely dirty floor can typically be restored to a near new condition.

- Vacuum relevant area.
- Remove difficult stains. See 'Removal of Challenging Stains' on previous page.
- Use a Scrubber-Dryer machine with soft brush rollers, warm water and a strong, alkaline all-purpose cleaner with a PH of 9-11. Wet the floor by running the machine with the recommended cleaning solution (do not use the suction function). If possible, clean the floor along the longitudinal weave direction.
- Leave for 5-10 minutes, without allowing it to dry.
- Rinse twice with clean water using the Scrubber-Dryer machine or until the floor no longer lathers.
