

A Healthier Alternative

With the added health benefits of Bolon, the choice is simple.

Hygienic & Hypo-allergenic

Bolon yarn is innately resistant to microbial invasion and with low VOC emissions, Bolon contributes positively to indoor air quality.

Impervious

The tight weave is secured by layers of impenetrable backing making Bolon impervious to liquids, spills and germs.

Easy to Maintain

With simple maintenance routines requiring no harmful chemicals and only a vacuum and mop, Bolon is an easy to maintain flooring solution. The compact yarn also results in fewer places for dirt to hide. Bolon is water resistant and can be scrubbed and cleaned using wet methods.

Comfort

Bolon provides comfort underfoot and has anti-static properties to protect against shocks.

Quality Product & Service

All collections are designed and manufactured in Sweden, allowing Bolon to control every step of the process, with a focus on quality.

Superior Technical Qualities

Superior technical qualities including up to 15-year warranty and suitable for heavy commercial traffic. Thickness 2.5mm – 4mm.

Sustainable & Free of Harsh Chemicals

Celebrated for its excellence and visionary approach to sustainability, and in accordance with the strictest environmental standards, Bolon uses only the highest quality raw material in its production and without phthalates.

Slip-resistant

The woven structure of Bolon flooring is slip resistant, making it appropriate for public areas.

Certified by Health Professionals

The comfort of textile flooring with superior health and performance benefits. Just ask the professionals.

Norwegian Asthma and Allergy Association (NAAF)

Certified by the Norwegian Asthma and Allergy Association (NAAF), Bolon accords with the principles of universal design to ensure interiors are accessible to all.

FloorScore®

Bolon has been independently tested and complies with indoor air quality emission requirements. Bolon contributes to cleaner, healthier indoor air through lower emissions of VOC's. Breath easier.

Best Practice PVC

Bolon complies with Best Practice PVC manufacturing guidelines, accrediting the minimisation of environmental and health risk impacts of the PVC life cycle.

ISO

ISO 9001 and ISO 14001 indicate that Bolon's quality and environmental control system for processes fulfils international standards.

When designing with Bolon, beauty and function co-exist in perfect harmony. Once you understand what makes Bolon beautiful on the inside, you'll start to see the external beauty in a different light. Even the science is beautiful when the design is in the performance.
